

KatzenLandschaft.de
Wir schaffen Freiraum für Ihre Katze

Dealer catalogue 2024

A natural choice

KatzenLandschaft.de took over the Danish company with its 25 years of experience at the end of 2023. Katzenlandschaft.de, which has been around since 2007, specializes in protection, safety and well-being. We develop high-performance cat furniture and safety devices in German quality and design.

Our furniture is based on natural materials, using wood, sisal and fabric in new, innovative and active ways to benefit you and your cat.

We offer you the opportunity to build your own cat system according to the needs of your cat(s). Our system can be installed not only vertically, but also horizontally and diagonally, e.g. on the wall, on the floor or in a combination. This depends entirely on you and your cat(s).

The covers of houses and shelves are easily washed without having to dismantle the system.

The tubes have a diameter of approx. 13 cm and are made of fully glued, heavy sisal Berber and the core is made of recycled plastic and is therefore more stable than cardboard tubes. The sizes range from 15 to 80 cm.

The floors with non-slip rubber are made of 25 mm birch plywood or MDF, treated with an antibacterial and oily varnish. Special treatment may be requested. All base frames are available in a natural or black finish.

The floor-ceiling systems include a pressure distributor with non-slip rubber and a base with non-slip rubber.

In different materials and colors
